

Potato Crop Insurance Storage Coverage Endorsement is applicable) of the end of the insurance period, by multiplying the production to count by the factor (not to exceed 1.0) that results from dividing the price received or that will be received per hundredweight of the damaged production by the highest available price election. This method of adjustment will not be performed if it has already been performed under the terms of section 11(g)(2)(i) of the Northern Potato Crop Insurance Provisions. If production is sold for a price lower than the value appropriate and representative of the local market, we will determine the value of the production based on the price you could have received in the local market.

(2) For harvested potatoes discarded within 21 days (60 days if the Northern Potato Crop Insurance Storage Coverage Endorsement is applicable) of the end of the insurance period and appraised unharvested production that could:

(i) Not have been sold, the production to count will be zero; or

(ii) Have been sold, the production to count will be determined in accordance with section 6(a)(1). The price used for the damaged production will be the price you could have received in the local market.

(3) For potatoes for which a price is not agreed upon in writing between you and a buyer within 21 days (60 days if the Northern Potato Crop Insurance Storage Coverage Endorsement is applicable) of the end of the insurance period and that remain in storage 22 or more days (61 or more days if the Northern Potato Crop Insurance Storage Coverage Endorsement is applicable) after the end of the insurance period, production to count will be determined in accordance with section 6(b).

(b) Grade less than U.S. No. 2 due to factors other than those specified in section 6(a) will be multiplied by a factor (not to exceed 1.0) that is determined as follows:

(1) The combined weight of sampled potatoes that grade U.S. No. 2 or better and that are damaged by freeze or tuber rot will be divided by the total sample weight; and

(2) The percentage determined in section 6(b)(1) above will be divided by the applicable percentage factor determined in accordance with section 10.

7. All grade determinations for the purposes of this endorsement will be made using the United States Standards for Grades of Potatoes for Processing or Chipping.

8. All determinations must be based upon a grade inspection.

9. The actuarial documents may provide "U.S. No. 1" in place of "U.S. No. 2" as used in this endorsement. If both U.S. No. 1 and 2 are available in the actuarial documents, you may elect U.S. No. 1 or 2 by potato type or group, if separate types or groups are specified in the Special Provisions.

10. *Percentage factor* means the historical average percentage of potatoes grading U.S. No. 2 or better, by type, determined from your records. If at least 4 continuous years of records are available, the percentage factor will be the simple average of the available records not to exceed 10 years. If less than four years of records are available, the percentage factor will be determined based on a combination of your records and the percentage factor contained in the Special Provisions.

[62 FR 65336, Dec. 12, 1997]

§ 457.145 Potato crop insurance—certified seed endorsement.

The potato Certified Seed Endorsement provisions for the 2001 and succeeding crop years are as follows:

FCIC policies:

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Potato Crop Insurance Certified Seed Endorsement

1. In return for payment of the additional premium designated in the actuarial documents, this endorsement is attached to and made part of your Northern Potato Crop Provisions subject to the terms and conditions described herein. In the event of a conflict between the Northern Potato Provisions and this endorsement, this endorsement will control.

2. For the purpose of this endorsement, the term "potato certified seed program" means the state program administered by the public agency responsible for the seed certification process within the state in which the seed is produced.

3. You must elect this endorsement on or before the sales closing date for the initial crop year you wish to insure your potatoes under this endorsement. This endorsement will continue in effect until canceled. It may be canceled by either you or us for any succeeding crop year by giving written notice to the other party on or before the cancellation date.

4. All potatoes grown on insurable acreage and that are entered into the potato seed certification program administered by the state in which the seed is grown must be insured unless limited by section 5 below.

5. Your certified seed production guarantee per-acre will be the per-acre production guarantee used to cover the same acreage under the terms of the Northern Potato Crop

Provisions. However, unless a written agreement provides otherwise, if the total amount of insurable certified seed acreage you have for the current crop year is greater than 125 percent of your average number of acres entered into and passing certification in the potato certified seed program in the three previous calendar years, your certified seed production guarantee for each unit will be reduced as follows:

6. You must provide acceptable records of your certified seed potato acreage and production for the previous three years. These records must clearly indicate the number of your acres entered into the potato seed certification program administered by the state in which the seed is grown.

7. All potatoes insured for certified seed production must be produced and managed in accordance with standards, practices, and procedures required for certification by the state's certifying agency and applicable regulations.

8. If, due to insurable causes occurring within the insurance period, the amount of certified seed you produce is less than your certified seed production guarantee, we will settle your claim by:

(a) Multiplying the insured acreage by its respective certified seed production guarantee;

(b) Multiplying each result in section 8(a) by the dollar amount per hundredweight contained in the Special Provisions for production covered under this endorsement;

(c) Totaling the results of section 8(b);

(d) Multiplying the number of hundredweight of production that qualify as certified seed and any amount of production lost due to uninsured causes, or that does not qualify as certified seed due to uninsured causes, by the dollar amount per hundredweight contained in the Special Provisions for production covered under this endorsement;

(e) Subtracting the result of section 8(d) from the result of section 8(c); and

(f) Multiplying the result of section 8(e) by your share.

9. You must notify us of any loss under this endorsement not later than 14 days after you receive notice from the state certification agency that any acreage or production has failed certification. Nothing herein extends the insurance period beyond the time period specified in section 8 of the Northern Potato Crop Provisions and section 11 of the Basic Provisions.

10. Acreage covered under the terms of this endorsement will have the same unit structure as provided under the Basic Provisions and the Northern Potato Crop Provisions. For example, if you have two optional units (00101 and 00102) under your Northern Potato Crop Insurance Policy and you elect this endorsement, you will also have two optional units (00201 and 00202) for certified seed coverage, provided that certified seed is grown

in both units 00101 and 00102. Or, if you have two basic units (00100 and 00200) under your Northern Potato Crop Insurance Policy and you elect this endorsement, you will also have two basic units (00300 and 00400) for certified seed coverage, provided that certified seed is grown in both units 00100 and 00200. In the event certified seed acreage is not grown in the same optional or basic units as acreage covered under the Basic Provisions and the Northern Potato Crop Provisions, certified seed units will be established in accordance with the unit division provisions contained in the Basic Provisions and the Northern Potato Crop Provisions. For example, if a basic unit is divided into two optional units for potato acreage covered under the Basic Provisions and the Northern Potato Crop Provisions, but certified seed is grown in only one of those optional units, the certified seed acreage will be insured as one basic unit.

11. Any production that does not qualify as certified seed because of varietal mixing or your failure to follow the standard practices and procedures required for certification will be considered as lost due to uninsured causes.
